SUMMARY

Computer Science student transitioning from academic projects and internship experience to a Software Development role. Bringing hands-on expertise in C, C++, Python, and full-stack technologies including React.js and Next.js with transferable skills in Data Structures & Algorithms and Machine Learning. Proven ability to build responsive front-end applications and optimize system-level modules that improved application stability, and eager to contribute to innovative development teams with scalable, high-performance solutions.

PROFESSIONAL EXPERIENCE

C & C++ Developer Intern – Remote, Pune, India

06/2024 – 07/2024
Pune(Remote)

- Worked on C/C++ based modules, focusing on debugging, memory management, and performance optimization to improve application stability.
- Collaborated with the development team to implement data structures, algorithms, and system-level features following best coding practices.

EDUCATION

Btech in computer Science

Sanjay Ghodawat Institute

08/2023 – Present
Kolhapur

Class XII

Willingdon College

07/2021 – 06/2023
Sangli

Class X

Savarkar prathishtan Sangli

03/2021
Sangli

SKILLS

- C, C++, Python, Java, SQL, AI, Github, Linux Operating System
- React.js, Next.js, Tailwindcss
- Data Structures and Algorithms, Web development, Machine Learning, Artificial Intelligence, DBMS

CERTIFICATES

- Introduction to Machine Learning – IIT Madras (NPTEL)
- OCI Generative AI Professional – Oracle Cloud Infrastructure
- Core Java (6 month course)

LANGUAGES

- Marathi
- English
- Hindi

PROJECTS

Traffic management using ai

04/2026 – 06/2026

- Developed an intelligent traffic control system using Machine Learning and Full-Stack Development technologies. Implemented YOLOv8 for real-time vehicle detection and density analysis, enabling dynamic traffic signal control based on vehicle density. Integrated emergency vehicle prioritization, real-time communication using Socket.io [!\[\]\(31b03e46ee8a80a1f1467b8c03bd76e8_img.jpg\)](#), and a 3D traffic simulation using Three.js. Utilized React.js, Node.js, Express.js, Python, and MongoDB to create a scalable solution for reducing traffic congestion and improving road safety.

Razorpay – Payment gateway for college

11/2025 – 12/2025

- Developed a web-based College Fee Payment System using PHP and MySQL with payment gateway integration. Implemented secure online fee payments, student authentication, transaction management, fee status tracking, and receipt generation through a user-friendly interface.
- **Technologies:** PHP, MySQL, HTML, CSS, JavaScript, Razorpay/Stripe.

Parking app – Online parking app

09/2025 – 2025

- Developed a web-based Online Parking Management System with online payment integration, allowing users to book parking slots, check real-time availability, and make secure payments. Implemented user authentication, slot management, booking tracking, payment processing, and reservation history through a user-friendly interface.
- **Technologies:** PHP, MySQL, HTML, CSS, JavaScript, Payment Gateway (Razorpay/Stripe).
